Instructions

Instructions to teachers/assessors

This teacher professional development register and vocational competency matrix is to be completed and updated on a regular basis so that it reflects your updated vocational competencies, experience, professional development and industry currency. It is recommended that teachers/assessors maintain and update their professional development logs (both for VET PD and industry currency) as soon as you have completed the activity.

Teachers/assessors must;

- Complete each part of this profile accurately and truthfully,
- Provide evidence, where required,
- Submit this completed profile into StudentWeb.
- Maintain industry currency and professional development in VET.
- **Purple text contains instructions.**

Section 1 – Teacher/assessor details

Personal details			
Full Name:	Ayhan Simsek		
Email:		Direct Phone (or mobile)	

Training and assessment qualifications/skills set/units of competency				
Detail all your relevant training and assessment qualifications, skills sets or units of competency.	Award issue date	Issuing organisation	Manager use verify	
			Sighted	Initial
22603VIC Certificate IV in Cyber Security	01/07/2024	Box Hill Institute	☐	
TAE40122 Certificate IV in Training and Assessment	In Progress	Box Hill Institute	☐	

Vocational/industry qualifications		
Detail all your vocational or other relevant qualifications, skills set, or units of competency.	Award issue date	Issuing organisation
Google Certified Professional ChromeOS Administrator	06/02/2024	Google
Google Cloud Certified Professional Google Workspace Administrator	12/12/2022	Google
Front-End Web Development	25/12/2023	General Assembly
Apple Teacher	13/09/2019	Apple

Professional memberships, affiliations and/or registrations (if applicable)			
Type (member/registration)	Organisation	Expiry/renewal date	Other details (if applicable)
Membership	Australian Information Security Association (AISA)	31/12/2026	Member ID: M265837ID

Section 2 – Vocational competency matrix and current industry skills

Vocational competency means the consistent application of knowledge and skill to the standard of performance required in the workplace. It embodies the ability to transfer and apply skills and knowledge to new situations and environments. Vocational Competency can be evidenced by holding the same unit, holding an equivalent older version of the same unit and verifying there are no gaps, holding an older version of the same unit and providing details of how gaps have been addressed, other formal qualifications, professional development relating to the unit or demonstrating equivalency through a recognition of prior learning and experience.

The

Current industry skills are the knowledge, skills and experience required by VET teachers and assessors and those who provide training and assessment under supervision to ensure that their training and assessment is based on current industry practices and meets the needs of industry.

Current industry skills may be informed by consultations with industry and may include, but is not limited to:

- a) having knowledge of and/or experience using the latest techniques and processes;
- b) possessing a high level of product knowledge;
- c) understanding and knowledge of legislation relevant to the industry and to employment and workplaces;
- d) being customer/client-oriented;
- e) possessing formal industry and training qualifications; and
- f) training content that reflects current industry practice.

Teachers/assessors must ensure all areas of each unit of competency are adequately addressed and sufficient verifiable evidence is provided.

Unit of competency delivered/assessed		Vocational competency held (or demonstrated equivalency)		Verifiable evidence of competence	Current industry skills/ experience directly relevant to the unit of competency
Unit code	Unit title				
List each unit of competency which is being delivered/assessed by this teacher/assessor for this training product.		Select the choice that aligns with how you will demonstrate vocational competency. <i>If you need to add more lines, then the drop down box can also be copied</i>	Detail the unit of competency code and title held by the teacher/assessor. Alternatively, detail how the teacher/assessor has demonstrated equivalent competency.	Provide details of what evidence is available to support vocational competence.	Provide details of current industry skills which are directly relevant to the unit of competency. Ensure verifiable evidence to support activity is retained.
Ensure you add the National code	Ensure you add the exact National title. Only list the UoC that you actually teach	Choose an item.	This is the column that describes why you have the skills and knowledge to teach a UoC. If you hold :	Ensure you have evidence for each statement you make	This is the column that describes how you have kept up to date in the past two years to teach and assess current industry skills and knowledge.
			The exact UoC; List the unit code and title only. Evidence would be the Statement of Completion		
			An equivalent UoC - List the unit code and title Compare Performance Criteria of equivalent UoC for any gaps in the UoC you hold Although the UoC may be equivalent, there can be subtle wording changes in PC Where no gaps are identified, insert the following statement: "No change in Performance Criteria and Performance Evidence in the unit of competency. Training package information states deemed as equivalent UoC"		
			A non-equivalent UoC Write an explanation that describes the gap between the old UoC and the current one and how you have addressed the gap to demonstrate competency at the UoC level. Compare Performance Criteria of non-equivalent unit for any gaps in the unit you hold Gap training or industry release required to address the gap.		

			A higher level vocational unit that aligns with the UoC, then describe how the higher level unit and the UoC align and describe how you have addressed any gaps to demonstrate competency at the UoC level.		
			A Higher Ed subject that aligns with the UoC then describe how the subject and the UoC align and describe how you have addressed any gaps to demonstrate competency at the UoC level.		
			An industry qualification then describe how the industry qual aligns with the UoC and describe how you have addressed any gaps to demonstrate competency at the UoC level.		
			Industry experience then describe how your industry experience addresses the UoC and describes your vocational competency, Approach it like a RPL description. Do not just use statements like "I have been a carpenter for 30 years" this is insufficient.		
ICTSAS426	Install and configure operating system software	I have industry experience to demonstrate competence in the UoC	Certificate IV in Cyber Security; Technical documentation of home lab builds	Over the past two years, I have performed multiple clean installations and configurations of Debian and Ubuntu Linux distributions on Proxmox nodes. I manage kernel updates and optimise OS settings for self-hosted services.	Over the past 24 months, I have maintained a virtualisation environment using Proxmox to deploy and configure multiple instances of Debian and Ubuntu Server. This includes performing clean installations, managing kernel updates, and optimising shell environments to ensure system stability for various self-hosted services. I stay updated with the latest Linux distribution releases and security patches to ensure best practices in OS deployment.
ICTNWK429	Install, configure and test a network	I have industry experience to demonstrate competence in the UoC	Network topology diagrams; Reference from previous ICT role	currently manage a multi-layered network environment using GL.iNet and ASUS hardware. I have successfully implemented VLAN segmentation to isolate IoT and guest traffic, and I regularly perform throughput testing to ensure network stability.	I currently manage a segmented network architecture using high-performance ASUS and GL.iNet hardware. Within the last two years, I have designed and tested VLAN configurations to isolate IoT and guest traffic, ensuring robust network security. I regularly use network diagnostic tools to monitor throughput and latency, staying current with modern networking protocols and hardware-based VPN solutions

ICTSAS440	Configure and troubleshoot operating system software	I have industry experience to demonstrate competence in the UoC	Incident logs; Technical support performance reviews	I actively troubleshoot complex software issues across Windows Server and Linux environments. This includes analysing system logs to resolve service failures in Docker containers and managing file system permissions for remote access via Cloudflare Tunnels.	My recent experience involves diagnosing complex software conflicts and service failures within both Windows Server and Linux-based virtual machines. I consistently use system log analysis (syslog and Event Viewer) to identify root causes and implement secure remote access solutions, such as Cloudflare Tunnels. I monitor technical forums and security bulletins to stay informed about emerging software vulnerabilities and troubleshooting methodologies
		Choose an item.			

Section 4 – Declaration and verification

Teacher/assessor declaration			
I declare that the information provided on this profile and any related documentation is true and accurate. I have provided certified copies of all qualifications, statements of attainment, transcripts and records of results that have been listed on this profile. I give permission for my employer to verify the accuracy of information provided.
