

Assessment 3: Product- Group Training and Delivery Plan

Assessment Name	Product Assessment- Group Training and Delivery Plan
Assessment task number	3
Description of assessment task	For this assessment task, you will select two (2) separate units of competency from a training package. You will develop two (2) Group Training and Delivery Plans, one for each unit of competency, to a specific learner cohort based on your consultation with industry.
Simulated or Workplace	Simulated or Workplace
Location	TBC

Conditions of assessment

Time allowed	N/A
Assessment location	Simulated or Workplace
Individual or group work	Individual
Student resources required	Computer internet access
Resources supplied TAFE	Assessment task requirements Virtual RTO – http://www.virtualrto.edu.au
Resources supplied by workplace	N/A
Resources supplied by student	Laptop or device to access the assessment task
Context and the conditions of assessment	Learner must conduct the assessments in accordance with the assessment conditions listed in the unit of competency. These describe the conditions for gathering evidence. You can collaborate with stakeholders to build a picture of, and industry and training needs required for your qualification, but your final submission must be your own work.

Submission instructions

What to submit	1x Stakeholder feedback 2x Group Training and Delivery Plans, one per unit of competency
How to submit work	Via your TAFE's LMS (Learning Management System) e.g. Moodle
How to present the work	Typed completed templates as outlined in the assessment criteria
How many assessment attempts are permitted	Three (3)
Level of assistance permitted	Nil

Assessment 3 Overview

For this assessment task, you will develop two (2) separate Group Training and Delivery Plans for **two (2) units of competency** selected from your qualification that meet the needs of a specific learner group based on your collaboration with stakeholders.

If you have any questions, please consult your assessor for clarification.

Part 1 – Consult with stakeholders / industry representatives

Consult with stakeholders to identify training needs for industry. This may include someone within your industry or an IA agent (please ask your trainer for instructions on how to use the IA agent option) if you do not have access to an industry stakeholder.

Complete the Part 1: Consult with Stakeholders to Plan for Vocational Training Template.

Part 2 & 3 – Group Training and Delivery Plan x2

1. From your selected qualification, select two (2) units of competency to use for assessment task 3.
2. Access Training.gov.au and search the 2 units of competency you selected from your qualification that will meet the training and assessment needs of your learner group.
3. Unpack and contextualise both units of competency to identify task skills and foundation skills.
4. Complete the **Group Training and Delivery Plan** template for assessment task 3.
5. Complete all sections of the plan.

Part 1- Collaborating with Stakeholders to Plan for Vocational Training

Student Name	Ayhan Simsek
Student ID	██████████
Date	12/07/2026

Collaborating with Stakeholders to plan for Vocational Training

Collaboration with Stakeholders	
a. Stakeholder's name:	Sarah ████████ IT Manager at TechSolutions Melbourne.

b. Stakeholders background: <i>Summarise details on the: context of the business area Stakeholders role</i>	Context of the business area: TechSolutions is a Melbourne-based IT services firm with 50 employees, currently transitioning to a hybrid work model and upgrading its internal network infrastructure. Stakeholder's role: Sarah is responsible for the overall IT strategy, network security, and ensuring the technical staff possess the necessary skills to manage the company's evolving environment.
c. Training goals: <i>What are the training needs identified and what is the outcome that the stakeholder would like to achieve?</i>	The stakeholder aims to improve the team's ability to diagnose complex network issues and effectively troubleshoot hardware and software problems. The desired outcome is a 20% reduction in downtime and improved adherence to security protocols.
d. Qualification or skill set? <i>Does this align with a training package qualification or skill set?</i>	The training aligns with the ICT40120- Certificate IV in Information Technology qualification.
e. Who would the training be targeted to? <i>Learner characteristics Job role and skills required.</i>	Learner characteristics: The training is targeted at Junior IT Support Technicians. Job role and skills required: They are responsible for level 1 and 2 support, managing workstation connectivity, and providing remote support for hybrid workers.
f. Foundation skills and the individual's needs: <i>Summarise the reading, writing, numeracy, oral communication, learning and digital skills (as much as known).</i>	Reading/Writing: Ability to interpret technical documentation and draft incident reports. Numeracy: Basic calculation for IP addressing and subnetting. Oral communication: Ability to communicate technical solutions to non-technical staff clearly. Learning/Digital skills: Proficiency in remote management tools and ticket management systems.

g. Discuss with the Stakeholder the delivery mode/s and training delivery arrangements <i>List any specialist support required</i>	Delivery Mode: Blended learning approach consisting of face-to-face workshops and supervised hands-on lab sessions. Specialist support: Mentorship from senior technicians and access to a virtualized lab environment for simulation.
---	--

Part 2- Plan #1: Group Training and Delivery

First selected unit of competency

Section 1

Learner/s: <i>First name and initial only</i>	Junior IT Staff (A.B., C.D.)
Qualification Code and Title: <i>List full details as per training.gov.au</i>	ICT40120- Certificate IV in Information Technology.
Course Entry Requirements:	Completion of Year 12 or equivalent technical experience as defined by the training package.
Specific requirements of the qualification as per the Companion Volume: <i>Search qualification on training.gov.au, look at the Companion Volume and list specific requirements for the qualification</i>	Must demonstrate competency across core ICT units and specific elective clusters including networking and troubleshooting.
Unit Code and Title:	Install and manage complex ICT networks.
Pre-requisite units:	ICTNWK502 (or equivalent)
Licensing and Regulatory Requirements:	Adherence to ACMA telecommunications standards and workplace health and safety (WHS) legislation.

Section 2

Complete this section in relation to the learner group.

A summary of the learners' characteristics (including diversity and accessibility) as relevant to this training session. <i>including aspects of diversity and accessibility relevant to this training session</i>
Small group of 5-8 technicians, varying levels of experience, diverse backgrounds, with a shared need for hands-on networking proficiency.
A summary of the learners' needs as relevant to this training session. <i>Are there any specific requirements, support, or disability.</i>

Requires access to hardware (routers/switches) and virtualized environments (like Proxmox or EVE-NG) to practice complex configurations safely.

A summary of the learners' expectations as relevant to this training session.

Expecting practical skills to manage VLANs, OSPF/BGP routing, and network security policies in a real-world enterprise environment.

Section 3

Complete this section in relation to foundation skills required.

Outline the foundation skills training strategy/ies you will be using.

Utilize "Scaffolding" techniques, where complex networking concepts are broken down into smaller, manageable tasks starting from basic connectivity to advanced routing.

List the foundation skills resources you will be using

Technical manuals, industry-standard configuration guides (Cisco/Juniper documentation), and online simulation labs.

Why did you choose these specific resources?

These resources provide an authentic, industry-standard reference, ensuring learners develop "real-world" digital and technical literacy

Section 4

Complete this section in relation to the training methods and resources you will be using during your training sessions.

List the training methods you will be using.

Materials, tools, and supports used to deliver learning and help learners achieve the required outcomes

Demonstration: Instructor-led live configuration of network devices.

Practical Lab Work: Hands-on task completion in a sandboxed environment.

Peer-to-peer Learning: Small group problem-solving sessions.

Why did you choose these specific methods? Provide details of where you located these (from RTO/Online/ industry

Your answer must be specific you cannot just say online – provide link to website or reference specific policies within your workplace

These methods facilitate active learning, allowing learners to apply theoretical knowledge to complex network scenarios directly.

List the resources/equipment you will be using.

Hardware: Managed switches and routers for physical lab connectivity.

Software/Tools: Proxmox VE for virtualization and EVE-NG for network topology emulation.

Reference Materials: Cisco documentation (<https://www.cisco.com>) and OpenWrt official technical guides (<https://openwrt.org>).

Why did you choose these specific resources/equipment? *This should demonstrate how they support your identified learner needs*

These provide an authentic environment matching the industry standard; specifically, using virtualization platforms allows for safe experimentation without affecting live production networks.

Section 5

Complete the delivery plan for the unit chosen. The delivery plan must comprise of a **minimum of three (3) sessions, and cover the entire unit of competency.**

Session 1: *Add rows as required*

Provide a breakdown of each topic you will cover in the session. Please add or delete rows as necessary.

Duration	4 hrs
Mode of delivery	Blended
Learning outcomes	VLAN/Subnet planning

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
Network architecture design	Designing a VLAN isolation strategy	PC 1.1, KE 1.2

Session 2: *Add rows as required*

Provide a breakdown of each topic you will cover in the session. Please add or delete rows as necessary.

Duration	4 hrs
Mode of delivery	Hands-on

Learning outcomes	Routing configuration
--------------------------	-----------------------

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
Implementing OSPF/BGP	Lab setup in EVE-NG	PC 2.3, PE 2.1

Session 3: *Add rows as required*

Provide a breakdown of each topic you will cover in the session. Please add or delete rows as necessary.

Duration	4 hrs
Mode of delivery	Review
Learning outcomes	Troubleshooting

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
Network security audit	Debugging connectivity issues	PC 3.4, PE 3.2

Section 6

Complete this section in relation to the overall Group Training and Delivery Plan.

List the legislative requirements you considered when developing your plan (e.g. Anti-discrimination).
Considered the <i>Privacy Act 1988</i> (ensuring learner and client data privacy) and <i>Work Health and Safety Act 2011</i> (ensuring a safe physical lab environment).
List the regulatory requirements you considered when developing your plan (e.g. training package requirements, access and equity)
Aligned with <i>ASQA Standards for RTOs 2015</i> , ensuring training package requirements for <i>ICTNWK529</i> are met and maintaining access and equity for all learners.
Describe how you considered the environment and sustainability when developing your plan.
Implemented a virtualization-first approach (Proxmox/EVE-NG) to reduce physical hardware waste and energy consumption, adhering to "Green IT" principles.
List the Virtual RTO TTAoE (The Training Academy of Excellence) policy and procedure you followed to document this plan
Followed the <i>TTAoE Training and Assessment Strategy (TAS) Development Policy</i> and <i>Learner Support Procedure</i> to ensure the plan is compliant with internal RTO standards
List the main features of the digital tools and electronic applications you used to help you develop this plan
Used <i>Microsoft Word</i> for documentation, <i>Draw.io</i> for network topology diagrams, and <i>Training.gov.au</i> for verifying unit requirements.
What instructional design model or theory have you applied when designing your learning program? Explain why you have used this approach.
Applied the ADDIE Model (Analysis, Design, Development, Implementation, Evaluation). This approach was chosen because it provides a structured, iterative framework ensuring that the training is tailored to the specific identified needs of the learners and industry.

Part 3- Plan #2: Group Training and Delivery

Second selected unit of competency.

Section 1

Learner/s: <i>First name and initial only</i>	David M., Emily W.
Qualification Code and Title: <i>List full details as per training.gov.au</i>	ICT40120- Certificate IV in Information Technology.
Entry Requirements: <i>List any entry requirements as per the UoC</i>	As per the training package, completion of general ICT foundations or equivalent professional experience.
Specific requirements of the qualification as per the Companion Volume: <i>Search qualification on training.gov.au, look at the Companion Volume and list specific requirements for the qualification</i>	Must demonstrate competency in client support services, hardware diagnostics, and software configuration.
Unit Code and Title:	ICTSAS426- Locate and troubleshoot ICT equipment, software and network problems.
Pre-requisite units:	ICTSAS422 or equivalent.
Licensing and Regulatory Requirements:	Compliance with IT industry standards, WHS regulations, and organizational data protection policies.

Section 2

Complete this section in relation to the learner group.

A summary of the learners' characteristics (including diversity and accessibility) as relevant to this training session. <i>including aspects of diversity and accessibility relevant to this training session</i>
A mix of junior and mid-level technicians, exhibiting strong technical curiosity but requiring more structured diagnostic methodologies.

A summary of the learners' needs as relevant to this training session. *Are there any specific requirements, support, disability,*

Needs include access to a diverse range of hardware (laptops, peripherals) and software environments to practice "real-world" troubleshooting scenarios.

A summary of the learners' expectations as relevant to this training session.

Expecting to master the use of diagnostic tools (e.g., event logs, packet sniffers) and improve their ticket resolution speed.

Section 3

Complete this section in relation to foundation skills required.

Outline the foundation skills training strategy/ies you will be using

Using "Problem-Based Learning" (PBL), where learners are presented with "broken" scenarios and must deduce the root cause using logical steps.

List the foundation skills resources you will be using

Official vendor diagnostic guides (e.g., Microsoft Support, Linux man pages) and internal IT knowledge base articles.

Why did you choose these specific resources?

These materials ensure that the learner builds the ability to independently research and resolve technical issues using authoritative sources.

Section 4

Complete this section in relation to the training methods and resources you will be using during your training sessions.

List the training methods you will be using.

Materials, tools, and supports used to deliver learning and help learners achieve the required outcomes

Demonstration: Instructor-led live configuration of network devices.

Practical Lab Work: Hands-on task completion in a sandboxed environment.

Peer-to-peer Learning: Small group problem-solving sessions.

Why did you choose these specific methods? Provide details of where you located these (from RTO/Online/ industry

Your answer must be specific you cannot just say online – provide link to website or reference specific policies within your workplace

These methods facilitate active learning, allowing learners to apply theoretical knowledge to complex network scenarios directly.

List the resources/equipment you will be using.

Hardware: Managed switches and routers for physical lab connectivity.

Software/Tools: Proxmox VE for virtualization and EVE-NG for network topology emulation.

Reference Materials: Cisco documentation (<https://www.cisco.com>) and OpenWrt official technical guides (<https://openwrt.org>).

Why did you choose this specific resources/equipment? *This should demonstrate how they support your identified learner needs*

These provide an authentic environment matching the industry standard; specifically, using virtualization platforms allows for safe experimentation without affecting live production networks.

Section 5

Complete the delivery plan for the unit chosen. The delivery plan must comprise of a **minimum of three (3) sessions, and cover the entire unit of competency.**

Session 1: *Add rows as required*

Provide a breakdown of each topic you will cover in the session. Please add or delete rows as necessary.

Duration	4 hrs
Mode of delivery	blended
Learning outcomes	Incident Logging and Ticket Triage

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
Ticket lifecycle management	Practice logging mock incidents using the Jira-based simulation.	PC 1.1, KE 1.1.

Session 2: *Add rows as required*

Provide a breakdown of each topic you will cover in the session. Please add or delete rows as necessary.

Duration	4 hours
Mode of delivery	Hands-on

Learning outcomes	Diagnostic Logic and Root Cause Analysis
--------------------------	--

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
Diagnostic Logic and Root Cause Analysis	Troubleshooting "dead" PCs and network peripheral failures.	PC 2.2, PE 1.3

Session 3: *Add rows as required*

Provide a breakdown of each topic you will cover in the session. Please add or delete rows as necessary.

Duration	4 hrs
Mode of delivery	Workshop
Learning outcomes	Documentation and Resolution Reporting

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
Finalizing resolution reports	Writing technical summaries for completed tickets.	PC 3.1, PE 2.2

Section 6

Complete this section in relation to the overall Group Training and Delivery Plan.

List the legislative requirements you considered when developing your plan (e.g. Anti-discrimination).
Considered <i>Work Health and Safety Act 2011</i> (safe handling of electrical hardware) and <i>Copyright Act 1968</i> (legal software usage).
List the regulatory requirements you considered when developing your plan (e.g. training package requirements, access and equity)
Aligned with <i>ASQA Standards for RTOs 2015</i> , prioritizing learner-centered support and assessment validity.
Describe how you considered the environment and sustainability when developing your plan.
Utilized remote diagnostic tools to reduce unnecessary travel to sites and implemented power-saving configurations during lab tests.
List the TTAoE (The Training Academy of Excellence) policy and procedure you followed to document this plan
Followed the <i>TTAoE Assessment Validation Procedure</i> to ensure all learner evidence meets competency requirements.
List the main features of the digital tools and electronic applications you used to help you develop this plan
Used <i>GitHub</i> for project hosting, <i>Jira</i> for ticketing simulation, and <i>Microsoft Teams</i> for group collaboration.
What instructional design model or theory have you applied when designing your learning program? Explain why you have used this approach.
This was chosen because it allows us to guide learners from basic "remembering" of troubleshooting steps to the "creating" of new, efficient support processes.

Submission Checklist

Ensure you submit the following:

- ☐ Part 1- Stakeholder collaboration document
- ☐ Part 2- Plan 1: Including sections 1-6
- ☐ Part 3- Plan 2: Including sections 1-6

Assessment Review

If you believe that you have been assessed unfairly, you have the right to request an informal assessment review. When your assessment cover sheet is returned to you, you can request an informal review by filling in the section below and returning it to your assessor or the Manager of your area. If you are not satisfied with the outcome, you can apply for a formal review of assessment on the application form

I request a review of my assessment for the following reasons:
