

Assessment 4: Product – Session Plans x 6 and Feedback

Assessment Name	Product Assessment- Session Plans
Assessment task number	4
Description of assessment task	For this assessment task, you will develop three (3) consecutive session plans for each of the two (2) units of competency you selected in Assessment Task 3. Totalling six (6) session plans. You will then seek feedback from a peer on assessment task 3 and assessment task 4
Simulated or Workplace	Simulated or Workplace
Location	TBC

Conditions of assessment

Time allowed	N/A
Assessment location	Workplace or simulated environment
Individual or group work	Individual
Student resources required	Computer and Internet
Resources supplied TAFE	Assessment task requirements Virtual RTO – http://www.virtualrto.edu.au
Resources supplied by workplace	N/A
Resources supplied by student	Laptop or device to access assessment task
Context and the conditions of assessment	Learner must conduct the assessments in accordance with the assessment conditions listed in the unit of competency. These describe the conditions for gathering evidence.

Submission instructions

What to submit	- Six (6) x completed session plans using the template taken from the Virtual RTO 1x Peer Review Form taken from the Virtual RTO per delivery plan
How to submit work	Via your TAFE's LMS (Learning Management System), e.g. Moodle
How to present the work	Typed completed templates as outlined in the assessment criteria
How many assessment attempts are permitted	Three (3)
Level of assistance permitted	Nil

Assessment 4 Overview

For this assessment task, you are required to develop six (6) session plans in total. These must cover the two units of competency you selected in Assessment Task 4 — with three (3) consecutive session plans for each unit.

You will then present one of your session plans, along with the group training and delivery plan from Assessment Task 3 to a peer, plus your assessor or another foundation skills specialist for feedback.

The session plans you create here may be used again in your next cluster, Deliver, so ensure they are detailed, practical, and ready for delivery- see Deliver Cluster: Task 3.2 (IMPORTANT during the delivery cluster as stated in the instruction 3.2 the 3 sessions you deliver on MUST be face-to-face (i.e. simulated trainer (you) and simulated learners must be in same physical location).

Part 1- Session Plan Template (unit 1)

This assessment task requires you to develop three (3) consecutive session plans for the first unit of competency in the Group Training and Delivery Plan you developed for your learner group in Assessment Task 3.

You may have previously completed a session plan in an earlier assessment. If the same learner group is accessible and the same unit is selected, you may refer to your prior research to complete some parts of this task. However, please note that the session plan for this cluster differs slightly from others.

If you have any questions, please consult your assessor for clarification.

Instructions

1. Access the Session Plan Template located in the Virtual RTO (<http://www.virtualrto.edu.au>).
2. Save three (3) copies of the template
3. Access the VRTO and follow the TTAE policy and procedure to complete a Session Plan for three (3) consecutive sessions as follows:
 - The learning objective/s of the session
 - At least two different facilitation method/s
 - Required resources – learning materials, equipment, technology, specialist support
 - Learning supports – additional supports, scaffolding, foundation skills support
 - Learning environment – how the room or site will be set up, WHS considerations
 - Session structure and timings – time, topic/activity, content, learning activities / formative assessments, resources

Session Plan Template

Session Plan x 3 (to be completed using the information from assessment task 3 Group Training and Delivery Plan and the first selected unit of competency).

Taken from Virtual RTO – <http://virtualrto.edu.au>

1.1

Unit Code and Title:	ICTNWK529- Install and manage complex ICT networks
Session number:	1
Trainer's name:	Ayhan Simsek
Date:	25 Jul 20206
Duration:	4 Hours
Location:	TTAoE Simulated Computer Lab

1.2 Learning Objective/s:

By the end of this session, learners will be able to:

By the end of this session, learners will be able to design a functional VLAN and subnetting plan based on a given enterprise network scenario

1.3 Facilitation Method: *How will you train the session? face to face, online, blended, on-site/workplace, classroom*

Face-to-face blended delivery (Instructor-led classroom theory followed by on-site practical lab work).

1.4 Resources needed: *Explain what kind of visual aid you will use including equipment and technology needed*

Note: This should be in line with your delivery method identified above

Whiteboard and projector for network topology diagrams. Proxmox VE environment for virtualization, managed switches, and access to Cisco/OpenWrt official technical guides.

1.5 Learning Support including foundation needs:

Provide a printed glossary of networking acronyms (to support LLN literacy requirements) and an IP subnetting calculator cheat sheet (to support LLN numeracy requirements).

1.6 Learning Environment: *Explain how the room or environment will be set up, including any technology & WHS requirements*

Computer lab environment setup with dual-monitor workstations. Virtualized lab environments (Proxmox) must be pre-provisioned. WHS Requirements: Ensure all Ethernet and power cables are secured in cable trays to prevent trip hazards.

1.7 Session Structure and Timings:

The session is divided into a 30-minute introduction, 180 minutes of core learning and practical activities (body), and a 30-minute conclusion. Detailed timings and activities are provided in the table below in section 1.8

1.8 Session Structure and Timings

Duration	Topic	Session Content/Trainer Instructions	Learning/Assessment Activities	Resources
SESSION TITLE: VLAN Architecture and Subnet Planning				
INTRODUCTION				
30 mins	Welcome & Safety	Welcome learners, conduct attendance, explain emergency exits and WHS cable management rules.	Listen and acknowledge WHS protocols.	Attendance sheet, L rules.
BODY				
60 mins	VLAN Theory	Explain the concept of broadcast domains and the necessity of VLANs for security and traffic isolation.	Interactive Q&A: Learners identify potential bottlenecks in a flat network.	Projector, Presentation slides.
60 mins	Subnetting Design	Demonstrate subnetting calculation. Specifically, design an isolation strategy using the 192.168.9.x subnet range for private IoT and isolated devices.	Formative Activity: Learners calculate IP ranges and subnet masks for 3 different departments.	Subnetting cheat sheet, Whiteboard
60 mins	Practical Application	Guide learners through mapping their subnet calculations onto a physical network topology diagram.	Peer Activity: Working in pairs, learners draw a network map integrating the 192.168.9.x isolation logic.	Draw.io software, workstation
CONCLUSION				
30 Mins	Review & Next Steps	Summarize key VLAN concepts. Check for understanding. Introduce tomorrow's topic (OSPF/BGP routing).	Learners ask final questions and save their Draw.io topologies.	Projector

1.1

Unit Code and Title:	ICTNWK529- Install and manage complex ICT networks
Session number:	2
Trainer's name:	Ayhan Simsek
Date:	25/07/2026
Duration:	4 Hours
Location:	TTAoE Simulated Computer Lab

1.2 Learning Objective/s:

By the end of this session, learners will be able to:

By the end of this session, learners will be able to configure OSPF and BGP routing protocols on managed routers to establish network connectivity.

1.3 Facilitation Method: *How will you train the session? face to face, online, blended, on-site/workplace, classroom*

Face-to-face blended delivery (Instructor-led demonstration followed by intensive hands-on practical lab work).

1.4 Resources needed: *Explain what kind of visual aid you will use including equipment and technology needed*

Note: This should be in line with your delivery method identified above

Projector for live demonstration. EVE-NG network topology emulator running on the Proxmox VE server. Digital copies of Cisco/OpenWrt routing configuration syntax guides.

1.5 Learning Support including foundation needs:

Provide step-by-step mathematical models to support numeracy skills required for routing metric calculations. Offer explicit LLN support via clear, scaffolded instructions and cheat sheets for Command Line Interface (CLI) syntax.

1.6 Learning Environment: *Explain how the room or environment will be set up, including any technology & WHS requirements*

Computer lab environment with pre-configured EVE-NG access on all dual-monitor workstations. WHS Requirements: Ensure appropriate screen brightness and encourage ergonomic seating and

stretching breaks to prevent eye strain and repetitive strain injury (RSI) during intensive CLI configuration tasks.

1.7 Session Structure and Timings:

The session is divided into a 30-minute introduction, 180 minutes of core learning and practical activities (body), and a 30-minute conclusion. Detailed timings and activities are provided in the table below in section 1.8.

1.8 Session Structure and Timings

Duration	Topic	Session Content/Trainer Instructions	Learning/Assessment Activities	Resources	Presentation method
SESSION TITLE: Routing Protocol Configuration (OSPF/BGP)					
INTRODUCTION					
30 mins	Welcome & Recap	Welcome learners, review VLAN concepts from Session 1. Introduce today's goal: connecting those isolated VLANs using OSPF and BGP routing.	Listen and participate in recap Q&A to recall previous knowledge.	Whiteboard.	Verbal / Q&A.
BODY					
60 mins	Routing Theory & OSPF	Explain internal vs. external routing protocols. Demonstrate OSPF configuration in a single area using the projector.	Observe demonstration and take notes on the CLI syntax.	Projector, Cisco guides.	Demonstration / Lecture.
60 mins	BGP Fundamentals	Introduce BGP for external routing. Show how to establish peerings and advertise routes.	Formative Activity: Learners answer a short written quiz on the differences between OSPF and BGP.	Slides, Quiz handouts.	Lecture & Activity.

Assessment 4: Product – Session Plans x 6 and Feedback

60 mins	EVE-NG Practical Lab	Guide learners to log into EVE-NG. Instruct them to configure OSPF and BGP between virtual routers to establish end-to-end ping connectivity.	Practical Task: Learners configure virtual routers in EVE-NG based on the provided lab topology.	EVE-NG, PC workstations.	Facilitated Lab Work.
CONCLUSION					
30 mins	Review & Lab Verification	Verify learner connectivity via ping tests. Summarize routing concepts. Explain that the next session will cover troubleshooting.	Learners verify their pings are successful and save their virtual router configs.	Projector, EVE-NG.	Verbal Summary.

1.1

Unit Code and Title:	ICTNWK529- Install and manage complex ICT networks
Session number:	3
Trainer's name:	Ayhan Simsek
Date:	25/07/2026

Duration:	4 Hours
Location:	TTAoE Simulated Computer Lab

1.2 Learning Objective/s:

By the end of this session, learners will be able to:

By the end of this session, learners will be able to identify, diagnose, and resolve network connectivity and security issues using standard diagnostic tools.

1.3 Facilitation Method: *How will you train the session? face to face, online, blended, on-site/workplace, classroom*

Face-to-face blended delivery (Review discussion followed by hands-on simulated troubleshooting in a controlled lab).

1.4 Resources needed: *Explain what kind of visual aid you will use including equipment and technology needed*

Note: This should be in line with your delivery method identified above

Whiteboard for incident mapping. Proxmox VE environment / EVE-NG loaded with "broken" network topologies. Software diagnostic tools (Wireshark, ping, traceroute) installed on learner PCs.

1.5 Learning Support including foundation needs:

Provide a structured troubleshooting flowchart to support logical deduction (foundation skills). Ensure clear, step-by-step written instructions are available to assist with reading comprehension of technical error logs.

1.6 Learning Environment: *Explain how the room or environment will be set up, including any technology & WHS requirements*

Computer lab environment. WHS Requirements: Maintain clear walkways and ensure all student bags are stowed securely under desks to prevent tripping hazards during the practical activities.

1.7 Session Structure and Timings:

The session is divided into a 30-minute introduction, 180 minutes of core learning and practical activities (body), and a 30-minute conclusion. Detailed timings and activities are provided in the table below in section 1.8

1.8 Session Structure and Timings

Duration	Topic	Session Content/Trainer Instructions	Learning/Assessment Activities	Resources	Presentation method
SESSION TITLE: Network Troubleshooting & Security Audit					
INTRODUCTION					
30 mins	Welcome & Scenario Briefing	Welcome learners. Review yesterday's OSPF/BGP configs. Introduce today's scenario: "The network is down, you must fix it."	Listen to the scenario briefing and form pairs for the troubleshooting exercise.	Whiteboard	Verbal Briefing.
BODY					
60 mins	Diagnostic Tools Refresher	Briefly demonstrate how to interpret Wireshark packet captures and routing tables to isolate faults.	Formative Activity: Learners answer a quick verbal Q&A on identifying ICMP vs. TCP traffic.	Projector, Wireshark.	Demonstration.
60 mins	"Break/Fix" Practical Lab	Release the "broken" EVE-NG topologies. Instruct learners to find the misconfigurations (e.g., incorrect subnets, broken OSPF links).	Practical Task: Learners systematically test connectivity and apply fixes to restore the network.	EVE-NG, PC workstations.	Facilitated Lab Work.

60 mins	Security Audit & Documentation	Guide learners on how to document their findings and ensure no unauthorized VLAN hopping is possible.	Learners draft a brief incident report detailing the root cause and the applied solution.	Report templates.	Peer Activity.
CONCLUSION					
30 min	Final Review & Unit Wrap-up	Review the most common errors found during the lab. Congratulate the class on completing the unit.	Ask final clarification questions and submit their incident reports to the trainer.	Whiteboard.	Q&A / Verbal Summary.

3.1 Peer Review Form

Taken from Virtual RTO – <http://virtualrto.edu.au>

TAE peer review form

Reviewer Name: _____ Muhammad [REDACTED] _____

Trainer's Name: _____

Thank you for agreeing to peer review your colleague's
Group Training and Delivery Plans and Session plans!

Your honest feedback will be constructive for your colleagues, ensuring they have met all the training package requirements and have effectively integrated foundation skills strategies and resources. This is also a learning exercise for you as a future trainer and assessor.

Please fill out each section and feel free to add comments. Once you have completed it, please return it to your colleague.

And don't forget, they are doing the same for you – it's a win/win!

Peer Review		
Please fill out each section and feel free to add comments. Once you have completed it, please return it to your colleague.		
Section 1: Training Objectives	Tick	Comments
Are the training objectives clearly stated?	☒ Yes	Objectives are clearly defined for each session and describe what learners will be able to do by the end of the training.
Do the objectives align with the needs of the target learner group?	☒ Yes	The objectives align well with ICT learners seeking practical networking and troubleshooting skills.
Are the learning outcomes measurable and specific?	☒ Yes	Outcomes are measurable through practical activities, quizzes, troubleshooting exercises and documentation tasks.
Section 2: Session Structure and Flow		
Are the sessions logically structured, with a clear beginning, middle, and end?	☒ Yes	All sessions include introductions, structured learning activities and effective conclusions.
Are the timings for each segment of the sessions appropriate?	☒ Yes	The allocation of theory, practical work and review time is balanced and realistic.
Do the sessions allow enough time for learner activities, practice and feedback?	☒ Yes	Learners are given extensive opportunities for hands-on practice and feedback throughout the sessions.
Section 3: Training Content		
Is the content relevant and accurate to meet the training objectives?	☒ Yes	Content directly supports the required skills and knowledge for both ICT units.
Is the content organised in an easy way for learners to follow and understand?	☒ Yes	The sequence from theory to practical application supports learner understanding and progression.
Does the content reflect current industry standards or practices?	☒ Yes	concepts reflect contemporary industry practices.
Section 4: Facilitation Methods and Learning Activities		
Are the facilitation methods appropriate for the type of content?	☒ Yes	Demonstrations, discussions, practical labs and peer activities are appropriate for technical training.
Do the learning activities engage learners and support the learning objectives?	☒ Yes	Activities encourage participation and reinforce practical workplace skills.
Are the activities varied enough to cater to different learning styles?	☒ Yes	Visual, auditory and kinaesthetic learning approaches are evident throughout the plans.

Section 5: Formative Assessments		
Are the formative assessments aligned with the learning outcomes?	☒ Yes	Formative assessments effectively measure learner progress against each session objective.
Do the formative assessments relate to the assessment requirements of the units of competency?	☒ Yes	Activities provide strong preparation for competency-based assessment requirements.
Section 6: Training Resources and Materials		
Are the training materials suitable for the learner cohort and session objectives?	☒ Yes	Resources support both theory delivery and practical skill development.
Do the materials enhance the learning experience?	☒ Yes	The use of simulations, software tools, templates and guides enhances learner engagement and understanding.
Section 7: Unit of Competency Requirements		
Does the proposed content cover the Required Skills and Knowledge of the units of competency?	☒ Yes	The content comprehensively addresses technical knowledge, troubleshooting and documentation requirements.
Do the session plans adequately support the development of foundation skills?	☒ Yes	Strong LLN support is evident through glossaries, templates, flowcharts, peer review activities and scaffolded instructions.
Will learners be adequately trained and prepared to undertake summative assessments?	☒ Yes	Learners have multiple opportunities to practise, apply and demonstrate skills before assessment.
Section 8: Overall Effectiveness		
Overall, do you think Group Training and Delivery Plan and Session plans effectively meet their objectives?	☒ Yes	Areas for improvement: The plans are comprehensive, industry relevant and learner focused. They integrate foundation skills well and provide strong practical learning opportunities. • Include additional contingency plans for learners who complete activities earlier than expected. • Add more explicit references to assessment benchmarks within some practical activities. • Consider incorporating short reflective learning journals to

		further strengthen foundation skills and learner self-assessment.
--	--	---

3.2 Feedback from Assessor or Foundation Skills Specialist

Feedback from Assessor or Foundation Skills Specialist	
Name and qualifications of person giving feedback:	Date and location of feedback meeting:
Amanda [REDACTED]	28/07/2026, TTAoE Campus
Record the questions and notes of responses:	
I confirm that the Group Training and Delivery Plan and the three session plans effectively address the requirements for ICTNWK529. Foundation skills are very well-supported through cheat sheets and glossaries. The practical EVE-NG lab activities are highly relevant to industry standards. Recommendation: Ensure you strictly monitor time during the 60-minute practical routing labs, as complex configurations can often run over time. Adding a quick mid-lab check-in would be beneficial to keep learners on track.	

3.3 Self Reflection

Self-reflection.
Now, analyse your feedback using the box below that you have received and make notes on the possible changes you will make to your Group Training and Delivery Plans and Session Plans moving forward
Reviewing the feedback from both my peer and the assessor, I will add a 'stretch goal' or extension activity for learners who finish their OSPF/BGP configurations early. I will also incorporate a 5-minute mid-lab check-in to ensure time management remains on track, and introduce brief reflective questions at the end of each session to further solidify foundation skills and learner self-assessment.

Part 2- Session Plan Template (unit 2)

This assessment task requires you to develop three consecutive session plans for **the second unit of competency** in the second group training and delivery plan you developed for your learner group in Assessment Task 3.

As mentioned above, you may have previously completed a session plan in an earlier assessment.

If you have any questions, please consult your assessor for clarification.

Instructions

1. Access the **Session Plan template** located in the Virtual RTO (<http://www.virtualrto.edu.au>).
2. Save another three copies of the template
3. Access the VRTO and follow the TTAE policy and procedure to complete one Session Plan for three consecutive sessions

Session Plan Template

2.1

Unit Code and Title:	ICTSAS446- Fault find and troubleshoot ICT equipment, hardware and software problems
Session number:	1
Trainer's name:	Ayhan Simsek
Date:	25/07/2026
Duration:	4 Hours
Location:	TTAoE Simulated Computer Lab

2.2 Learning Objective/s:

By the end of this session, learners will be able to:

By the end of this session, learners will be able to accurately log, categorize, and triage simulated IT incidents within a helpdesk ticketing system.

2.3 Facilitation Method: *How will you train the session? face to face, online, blended, on-site/workplace, classroom*

Face-to-face blended delivery (Classroom theory on ITIL ticketing principles followed by practical simulation).

2.4 Resources needed: *Explain what kind of visual aid you will use including equipment and technology needed*

Note: This should be in line with your delivery method identified above

Projector and whiteboard for demonstrating ticket lifecycles. Standard office workstations for learners. Jira Service Desk (or equivalent simulated ticketing software) configured on the local network.

2.5 Learning Support including foundation needs:

Provide standardised IT ticket templates with sentence starters. This supports the LLN writing/literacy skills required to draft clear and professional incident descriptions.

2.6 Learning Environment: *Explain how the room or environment will be set up, including any technology & WHS requirements*

Standard computer lab layout facing a main projector screen. WHS Requirements: Ensure appropriate lighting to minimize screen glare and mandate standard ergonomic desk setups for all learners.

2.7 Session Structure and Timings:

The session consists of a 30-minute introduction, 180 minutes of core learning (theory and practical ticketing activities), and a 30-minute conclusion. Detailed timings and activities are provided in section 2.8.

TAE40122 Certificate IV in Training and Assessment
Cluster: TAELLN422 | TAEDES412 Design Training
Assessment Guide
Assessment 4: Product – Session Plans x 6 and Feedback

2.8 Session Structure and Timings

Duration	Topic	Session Content/Trainer Instructions	Learning/Assessment Activities	Resources	Presentation method
SESSION TITLE: Incident Logging and Ticket Triage					
INTRODUCTION					
30 mins	Welcome & Overview	Welcome learners. Explain WHS ergonomics. Introduce the goal: How to properly log an IT problem so it can be fixed quickly.	Listen, adjust seating for ergonomics, and ask initial questions.	Attendance sheet.	Verbal Briefing.
BODY					
60 mins	The Ticket Lifecycle	Explain the ITIL lifecycle of a ticket (New, Assigned, In Progress, Resolved, Closed). Define severity vs. priority.	Formative Activity: Learners categorize 5 sample IT problems by priority (High, Med, Low).	Slides, Projector.	Lecture & Q&A.
60 mins	Ticketing Software Demo	Demonstrate how to log into the Jira simulation, create a new ticket, and fill in mandatory fields (User, Asset, Issue Description).	Observe the demonstration and take notes on the required fields.	Jira Software, Projector.	Demonstration.

TAE40122 Certificate IV in Training and Assessment
Cluster: TAELN422 | TAEDES412 Design Training
Assessment Guide
Assessment 4: Product – Session Plans x 6 and Feedback

60 mins	Practical Ticketing Lab	Provide learners with "user complaint" scenarios. Instruct them to translate these into professional tickets in the system.	Practical Task: Learners create 3 tickets each, using the provided sentence starters.	Jira Software, Ticket Templates.	Facilitated Lab Work.
CONCLUSION					
30 mins	Review & Triage	Review the tickets created by the class on the projector screen. Provide constructive feedback on clarity.	Discuss their ticket descriptions and update any unclear information.	Projector.	Verbal Feedback.

2.1

Unit Code and Title:	ICTSAS446- Fault find and troubleshoot ICT equipment, hardware and software problems
Session number:	2
Trainer's name:	Ayhan Simsek
Date:	25/07/2026

Duration:	4 Hours
Location:	TTAoE Simulated Computer Lab / Hardware Workshop

2.2 Learning Objective/s:

By the end of this session, learners will be able to:

By the end of this session, learners will be able to apply root cause analysis methodologies to systematically diagnose hardware and software failures.

2.3 Facilitation Method: *How will you train the session? face to face, online, blended, on-site/workplace, classroom*

Face-to-face hands-on workshop (Trainer demonstration followed by group-based hardware/software troubleshooting).

2.4 Resources needed: *Explain what kind of visual aid you will use including equipment and technology needed*

Note: This should be in line with your delivery method identified above

Faulty computer hardware (RAM, hard drives with bad sectors), digital multimeters, POST diagnostic cards. Sysinternals Suite installed on testing environments for software diagnostics.

2.5 Learning Support including foundation needs:

Provide a visual "Root Cause Analysis (RCA)" flowchart (e.g., Fishbone diagram template). This visual scaffolding helps learners logically process diagnostic steps without relying heavily on complex technical reading (LLN support).

2.6 Learning Environment: *Explain how the room or environment will be set up, including any technology & WHS requirements*

Hardware testing workshop. WHS Requirements: Mandate the use of anti-static wrist straps when handling exposed hardware. Ensure clear benches free of clutter to prevent dropping heavy equipment.

2.7 Session Structure and Timings:

The session consists of a 30-minute introduction, 180 minutes of core learning (theory and practical ticketing activities), and a 30-minute conclusion. Detailed timings and activities are provided in section 2.8.

TAE40122 Certificate IV in Training and Assessment
Cluster: TAELN422 | TAEDES412 Design Training
Assessment Guide
Assessment 4: Product – Session Plans x 6 and Feedback

2.8 Session Structure and Timings

Duration	Topic	Session Content/Trainer Instructions	Learning/Assessment Activities	Resources	Presentation method
SESSION TITLE: Diagnostic Logic and Root Cause Analysis					
INTRODUCTION					
30 mins	Welcome & WHS Check	Brief learners on hardware handling safety (anti-static wristbands). Recap yesterday's ticket logging session.	Put on anti-static wristbands and review WHS guidelines.	Anti-static bands.	Verbal Briefing.
BODY					
60 mins	RCA Methodologies	Explain the OSI model (Bottom-up vs. Top-down troubleshooting). Demonstrate how to use the Fishbone diagram for IT faults.	Formative Activity: Learners map a "Blue Screen of Death" issue onto an RCA flowchart.	Flowchart templates, Whiteboard.	Lecture & Activity.
60 mins	Hardware Diagnostics	Demonstrate the use of POST cards and multimeter testing on dead power supplies.	Observe the trainer and note safety procedures for electrical components.	Faulty PSUs, Multimeters.	Demonstration.
60 mins	Simulated Troubleshooting	Assign pairs to a "dead" PC workstation. Instruct them to find and replace the faulty component using logical deduction.	Practical Task: Learners test components, find the fault, and replace the broken part.	"Broken" PCs, Spare parts.	Facilitated Lab Work.

TAE40122 Certificate IV in Training and Assessment
Cluster: TAELN422 | TAEDES412 Design Training
Assessment Guide
Assessment 4: Product – Session Plans x 6 and Feedback

CONCLUSION					
30 mins	Lab Clean-up & Review	Guide learners to clean their workstations. Ask each group to explain what component failed and how they found it.	Pack up tools and verbally summarize their diagnostic process.	None.	Q&A / Verbal Summary.

2.1

Unit Code and Title:	ICTSAS446- Fault find and troubleshoot ICT equipment, hardware and software problems
Session number:	3
Trainer's name:	Ayhan Simsek
Date:	25/07/2026
Duration:	4 Hours
Location:	TTAoE Simulated Computer Lab

2.2 Learning Objective/s:

By the end of this session, learners will be able to:

By the end of this session, learners will be able to draft clear and concise technical resolution reports for closed tickets.

2.3 Facilitation Method: *How will you train the session? face to face, online, blended, on-site/workplace, classroom*

Face-to-face workshop (Interactive writing session with peer review and trainer feedback).

2.4 Resources needed: *Explain what kind of visual aid you will use including equipment and technology needed*

Note: This should be in line with your delivery method identified above

Projector for displaying "good vs. bad" ticket resolution notes. Jira Service Desk (or equivalent) for updating the tickets created in Session 1. Whiteboard.

2.5 Learning Support including foundation needs:

Implement peer-to-peer review pairing (pairing stronger readers/writers with those needing support).
Provide a "resolution terminology guide" to assist with professional vocabulary (LLN Literacy support).

2.6 Learning Environment: *Explain how the room or environment will be set up, including any technology & WHS requirements*

Standard computer lab layout. WHS Requirements: Ergonomic checks to ensure monitors are at eye level during sustained typing activities.

2.7 Session Structure and Timings:

The session consists of a 30-minute introduction, 180 minutes of core learning (theory and practical ticketing activities), and a 30-minute conclusion. Detailed timings and activities are provided in section 2.8.

2.8 Session Structure and Timings

Duration	Topic	Session Content/Trainer Instructions	Learning/Assessment Activities	Resources	Presentation method
SESSION TITLE: Documentation and Resolution Reporting					
INTRODUCTION					
30 mins	Welcome & Objective	Welcome learners. State the importance of documentation: "If it isn't documented, it didn't happen."	Listen and participate in discussion about why IT documentation matters.	Whiteboard.	Verbal Briefing.
BODY					
60 mins	Anatomy of a Resolution Note	Display examples of poorly written vs. excellently written resolution notes on the projector. Highlight the required structure (Issue > Steps Taken > Resolution).	Formative Activity: Learners read 3 sample notes and identify the missing information in each.	Projector, Handouts. Lecture & Activity.	Projector, Handouts. Lecture & Activity.
60 mins	Drafting the Reports	Instruct learners to log back into Jira and write professional resolution notes for the hardware faults they fixed in Session 2.	Practical Task: Learners update their Jira tickets with full resolution details using the terminology guide.	Jira Software, Terminology guide. Facilitated Lab Work.	Jira Software, Terminology guide. Facilitated Lab Work.

60 mins	Peer Review Activity	Ask learners to swap seats and read their partner's resolution notes. Instruct them to check for clarity and professionalism.	Peer Activity: Learners provide constructive feedback on their partner's writing.	Workstations. Peer-to-peer Learning.	Workstations. Peer-to-peer Learning.
CONCLUSION					
30 min	Final Unit Summary	Review common documentation mistakes. Congratulate the class on successfully completing the troubleshooting unit.	Ask final questions and log out of the simulated ticketing system.	Whiteboard.	Q&A / Verbal Summary.

Part 3 – Peer Review

The purpose of this assessment is to gather feedback on:

- your **Group Training and Delivery Plans** from Assessment Task 3
- the **Session Plans** you have just created

This feedback will help confirm that:

- you have met all unit requirements
- you have effectively integrated **foundation skills resources and strategies**
- your plans are suitable for the learner cohort and learning environment

Instructions

1. Select a Peer for Review

- Choose one peer to review your work.
- If you are completing this cluster individually, speak to your assessor so they can match you with another learner.

2. Exchange Plans for Peer Review

- Name and bundle your documents together for sharing
 - UoC folder
 - Group Training and Delivery Plan x1
 - Session plan x3
 - the **Peer Review Form** located in the Virtual RTO: <http://www.virtualrto.edu.au/>
- Swap the suite of documents with your peer and also complete a Peer Review Form for them.
- Repeat with your second unit, with the same peer, or, ideally, a different peer to get a different perspective.

3. Meet With Your Assessor or a Foundation Skills Specialist

- Arrange a meeting (in-person or online via Microsoft Teams or Zoom).
- Present the following documents:
 - your **Group Training and Delivery Plan**
 - your **Session Plans**
- Request specific feedback on how you have integrated **foundation skills resources and strategies** into both documents.
- Take notes during the meeting for submission – no template is provided.

4. Review Feedback and Identify Adjustments

- Review feedback from:
 - your **peer**
 - your **assessor** or **foundation skills specialist**
- Make notes on:
 - what changes or improvements could be made
 - how foundation skills support could be strengthened
 - any gaps identified in your plans
- These notes will form part of your submission.

3.1 Peer Review Form

Taken from Virtual RTO – <http://virtualrto.edu.au>

TAE peer review form

Reviewer Name: Muhammad [REDACTED]

Trainer's Name: _____

Thank you for agreeing to peer review your colleague's
Group Training and Delivery Plans and Session plans!

Your honest feedback will be constructive for your colleagues, ensuring they have met all the training package requirements and have effectively integrated foundation skills strategies and resources. This is also a learning exercise for you as a future trainer and assessor.

Please fill out each section and feel free to add comments. Once you have completed it, please return it to your colleague.

And don't forget, they are doing the same for you – it's a win/win!

Peer Review		
Please fill out each section and feel free to add comments. Once you have completed it, please return it to your colleague.		
Section 1: Training Objectives	Tick	Comments
Are the training objectives clearly stated?	☒ Yes	Each session objective is clearly written and focuses on practical troubleshooting competencies.
Do the objectives align with the needs of the target learner group?	☒ Yes	The objectives are relevant to learners pursuing ICT support and helpdesk roles.
Are the learning outcomes measurable and specific?	☒ Yes	Outcomes can be measured through ticket creation, fault diagnosis, troubleshooting tasks and resolution reporting.
Section 2: Session Structure and Flow		
Are the sessions logically structured, with a clear beginning, middle, and end?	☒ Yes	The sessions progress logically from incident logging to diagnosis and then technical reporting.
Are the timings for each segment of the sessions appropriate?	☒ Yes	Adequate time has been allocated for demonstrations, practical exercises and learner feedback.
Do the sessions allow enough time for learner activities, practice and feedback?	☒ Yes	The practical workshop activities provide sufficient hands-on experience and reflection opportunities.
Section 3: Training Content		
Is the content relevant and accurate to meet the training objectives?	☒ Yes	The content reflects realistic workplace troubleshooting scenarios and industry expectations.
Is the content organised in an easy way for learners to follow and understand?	☒ Yes	The learning sequence supports gradual skill development and learner confidence.
Does the content reflect current industry standards or practices?	☒ Yes	Industry-standard tools, ticketing systems, diagnostic methods and reporting practices are incorporated.
Section 4: Facilitation Methods and Learning Activities		
Are the facilitation methods appropriate for the type of content?	☒ Yes	Demonstrations, workshops, peer reviews and practical troubleshooting activities are highly appropriate.
Do the learning activities engage learners and support the learning objectives?	☒ Yes	Activities provide meaningful opportunities to apply troubleshooting techniques in realistic scenarios.
Are the activities varied enough to cater to different learning styles?	☒ Yes	The sessions include visual aids, demonstrations, discussions and practical tasks that support diverse learners.
Section 5: Formative Assessments		

Are the formative assessments aligned with the learning outcomes?	☒ Yes	Assessment activities directly measure learners' progress against session objectives.
Do the formative assessments relate to the assessment requirements of the units of competency?	☒ Yes	The assessment tasks provide suitable evidence for competency development.
Section 6: Training Resources and Materials		
Are the training materials chosen suitable for the learner cohort and the session objectives?	☒ Yes	Software tools, hardware components and learning guides effectively support both theory and practice.
Do the materials enhance the learning experience?	☒ Yes	The resources promote active participation and realistic workplace problem-solving skills.
Section 7: Unit of Competency Requirements		
Does the proposed content cover the Required Skills and Knowledge of the units of competency?	☒ Yes	The plans comprehensively address troubleshooting processes, diagnostic techniques and documentation requirements.
Do the session plans adequately support the development of foundation skills?	☒ Yes	Strong foundation skills support is evident through templates, peer reviews, flowcharts and scaffolded learning materials.
Will the learners have been adequately trained and prepared to undertake summative assessments upon completing each unit via the proposed delivery plan?	☒ Yes	Learners will be well prepared through progressive practical activities and regular feedback opportunities.
Section 8: Overall Effectiveness		
Overall, do you think Group Training and Delivery Plan and Session plans effectively meet their objectives?	☒ Yes	Areas for improvement: The training plans are practical, learner-centred and aligned with industry expectations. They effectively support both technical competency and foundation skill development. • Include a larger variety of troubleshooting case studies to expose learners to more diverse technical issues. • Add short knowledge-check quizzes between practical activities to reinforce key concepts. • Consider including more collaborative group troubleshooting exercises to strengthen teamwork and communication skills. • Provide optional advanced

		troubleshooting scenarios for higher-performing learners.

3.3 Feedback from Assessor or Foundation Skills Specialist

Feedback from Assessor or Foundation Skills Specialist	
Name and qualifications of person giving feedback:	Date and location of feedback meeting:
Amanda [REDACTED]	28/07/2026, TTAoE Campus
Record the questions and notes of responses:	
The session plans for ICTSAS446 are practical, well-structured, and perfectly capture a realistic helpdesk environment. The integration of Jira simulations and physical hardware troubleshooting provides an excellent blended learning experience. Recommendation: Consider modifying the hardware troubleshooting lab to include a structured peer-collaboration exercise. Having learners explain their diagnostic steps to a partner will further develop their oral communication foundation skills.	

3.3 Self Reflection

Self-reflection.
Now, analyse your feedback using the box below that you have received and make notes on the possible changes you will make to your Group Training and Delivery Plans and Session Plans moving forward
Based on the constructive feedback received, I will adjust my session plans to include a wider variety of 'broken' hardware case studies to expose learners to more diverse troubleshooting scenarios. I will also modify the hardware diagnostic lab to feature structured collaborative pair activities. This will directly address the assessor's recommendation to improve teamwork and oral communication skills during technical tasks.

Submission Checklist

Ensure you submit the following:

- ☐ Unit 1 – Three (3) consecutive session plans developed and provided
- ☐ Unit 2 – Three (3) consecutive session plans developed and provided
- ☐ 2 x Peer Review Forms (includes student analysis)
- ☐ 3.2 - Summary of feedback received from your assessor or foundation skills specialist
- ☐ 3.3 - Notes on adjustments you may make based on the peer and assessor/specialist feedback

Product Evidence, Criteria and Benchmarking

AT4 PRODUCT – SESSION PLANS X 6 AND FEEDBACK			
Task criteria or requirements for successful completion	Satisfactory / Not yet satisfactory		Standard or benchmark for performance
1. Session Plans x 3 for first unit of competency	S	NYS

Assessment Review

If you believe that you have been assessed unfairly, you have the right to request an informal assessment review. When your assessment cover sheet is returned to you, you can request an informal review by filling in the section below and returning it to your assessor or the Manager of your area. If you are not satisfied with the outcome, you can apply for a formal review of assessment on the application form

I request a review of my assessment for the following reasons:
